

HOW TO DETERMINE HANDING FOR HARDWARE

The correct handing is important to ensure that your order is correct. Even though the door may specify a handing, your hardware handing may be opposite depending on the side of your door where you can see the hinge pins. Use the following diagram to determine your handing.

Outswing doors use the REVERSE bevel

Use the following codes to specify handing:

LH = Left Hand Inswing

RH = Right Hand Inswing

LHR = Left Hand Reverse - Outswing

RHR = Right Hand Reverse - Outswing
